

International Health Facility Assessment Network. (2008). *Flowchart of Steps to Conduct a Health Facility Assessment* (MS-08-28). Chapel Hill, North Carolina, USA: MEASURE Evaluation.

**<Abstract>**

The flow chart is a step-by-step guide, in visual form, of key stages in the preparation and conduct of a health facility assessment (HFA). It has two parts, the first being a short presentation of the actual stages, the people involved in them, any documentation available for more details, and any special considerations. The second part is a narrative description of issues related to each stage, and information to help the reader understand how each stage is connected to the preceding and subsequent stages.
